FOR IMMEDIATE RELEASE

### **Matthews Marking Systems is Bringing Marking and Coding Solutions for the Steel and Iron Industry to AISTech 2019**

Pittsburgh, PA (April 17, 2019) – Matthews Marking Systems, a Matthews International company, will be exhibiting at AISTech Expo in Pittsburgh, PA May 5 – 7, 2018. This show brings together companies and professionals of the iron and steel industry, providing a platform for discussion,

training and collaboration.

Matthews has the solutions to mark and code on a variety of metals, both permanent and removable. Applications vary across the board, such as regulatory agency compliance (ICBO, ICC, SBCCI, NFPA, etc.), high- and low-volume production, and even industry-specific inks. In

addition to a wide variety of inks, Matthews DOD (Drop-on-Demand) valve jet printheads rank as the most reliable and robust in the steel and iron industry due to its unmatched durability in harsh factory environments.

Matthews Marking Systems also offers laser solutions for permanent coding. Laser marking and coding on steel is fast, high-resolution and brings down the cost of consumables.

To inquire about further solutions, stop by the Matthews Marking Systems booth #726 and talk with one of the marking and coding experts.
