FOR IMMEDIATE RELEASE

### **Matthews Marking Systems to Exhibit at FabTech in Chicago**

Wilsonville, OR (October 29, 2019) – Matthews Marking Systems, a Matthews International company, will be exhibiting at FabTech in Chicago, IL November 8-11, 2019.

FabTech brings innovation and technology solutions to over 48,000 attendees as North America's largest metal forming, fabricating, welding and finishing event.

Matthews has solutions to mark and code on all types of metals at various stages, both permanent and removable. In addition to a wide variety of inks, Matthews DOD (Drop-on-Demand) valve jet printheads rank as the most reliable and robust in the industry due to their unmatched durability in harsh factory environments. Matthews also offers laser coding solutions for permanent marking. Laser marking and coding on metal is fast, high-resolution and brings down the cost of consumables.

Being demonstrated in booth A1210 will be Matthews' own universal controller, the automation platform MPERIA®. MPERIA provides the ability to control printheads and third-party equipment across production lines, regardless of equipment manufacturer. This enables customers to manage their marking and coding operations at any point in their production line from one location, thus increasing efficiency, reducing errors, and improving quality.
