

Mperia L-Series Printhead L25

Getränke Felber is a beverage store with an own bottle filling machine.

Application

The customer needs a cheap and easy solution for a best before marking.

We test the L-Series with LS6021 cartridge and it works very fine and liable.

The environment is dry, there's no typical beverage humidity.

The only tricky thing is the different height of the glass-bottles. But with our Lexmark cartridge we have a bigger throw distance with the ink drops and we can handle it.

Details
